SUMMARY

Innovative and detail-oriented Computer Science graduate and prompt engineer passionate about designing and building efficient, scalable software solutions. Eager to apply a strong foundation in web development, database management, and problem-solving to create impactful and user-friendly applications. Committed to continuous learning and delivering high-quality results.

EDUCATION

Synergy Institute of Technology, Bhubaneswar <i>Bachelor's degree in Computer Science Engineering CGPA: 8</i>	2022 - 2025
Suddhananda Residential Polytechnic, Cuttack <i>Diploma in Computer Science Engineering CGPA: 8</i>	2019 - 2022
Vikas Vidyalaya, Jamshedpur <i>CBSE (Class 10) CGPA:7.8</i>	2018 - 2019

SKILLS

- **Languages:** Python, PHP, JavaScript, Core Java, Arduino
- **Web Technologies:** HTML, CSS, Bootstrap, Django, React.js
- **GUI:** Tkinter
- **Database:** MySql, Oracle
- **Cloud Technology:** Google Cloud Platform(GCP)
- **Version Control / Tools:** GitHub, Git, VS Code

WORK EXPERIENCE

Bharat Intern <i>Web Developer Intern, Remote</i>	Aug 2024-Sep 2024
• Developed interactive web components using JavaScript, enhancing user experience by 20%. • Optimized website functionality and ensured cross-browser compatibility.	
Skolar Company <i>Full Stack Web Developer Intern, Remote</i>	May 2023 - July 2023
• Built and deployed a functional clone website using Netlify, improving deployment efficiency. • Collaborated with a cross-functional team to enhance website features and user experience.	

PROJECTS

Soilguard - IOT based Project	Mar 2025
• Developed a system using Arduino Uno and sensors for testing soil to save time and money of users. • Implemented libraries and tested soil moisture, temperature, humidity, and air quality.	
Online Crime Management System - Python based Project	Feb 2025
• Developed a system using Python, Tkinter, and MySQL to efficiently store and manage criminal data, including FIR records. • Implemented CRUD and search operations, streamlining data retrieval by 30%.	
Blood and Organ Donation Website	Jan 2025
• Created a web application using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL to facilitate blood and organ donation. • Enabled efficient donor and recipient data management, reducing manual record errors by 25%.
